Aspiring Web Developer with a passion for creating user-friendly and visually appealing websites. Seeking an entry-level position to apply my technical skills and gain experience from seasoned developers.

Education

BSCS | 2023-2027 | UNIVERSITY OF MANAGEMENT AND TEHCNOLOGY

CGPA: 3.27

FSC | 2020-2022 | GOVT COLLEGE OF SCIENCE

Score: 1006

Skills & Abilities

React JS | Next JS | MUI | Tailwind CSS | SQL | Postman | Typescript | PostgreSQL | Nest JS

Experience

INTERN | THE DEV CORPORATE | NOV 2024 – MAY 2025

- Built responsive web pages and UI components using React, improving user experience and load speed. Collaborated with team to fix bugs and integrate APIs for dynamic content.

Projects

- Darat Booking Engine**

Description: A platform for booking doctor appointments, purchasing medications, and accessing dermatology related services.

Technologies: React JS, Nest JS, PostgreSQL, MUI

Responsibilities: Developing the front-end and performing testing.

- Horizon**

Description: A platform for an immigration company offering residency solutions in Saudi Arabia. The platform showcases various residency plans and helps users explore and apply for the option that best suits their needs.

Technologies: Next JS, Tailwind CSS

Responsibilities: Developing the front-end and performing testing.

- Map Animation**

Description: A platform for managing flight schedules, checking flight timings and delays, and tracking the real time location of aircraft.

Technologies: Next JS, Tailwind CSS

Responsibilities: Developing the front-end.

- HRM**

Description: A comprehensive platform for managing office operations, including employee check-in/check-out times, salary details, active project tracking, and job application management. The system also provides insights into ongoing projects across the company and enables tracking of individual employee profiles and performance

Technologies: React JS, MUI, Redux Toolkit, Nest JS, PostgreSQL, Postman

Responsibilities: Responsible for front-end development, API integration, and application testing.

- **Wolves Art**

Description: A creative digital artwork project focused on portraying wolves in a visually striking and symbolic style. The art emphasizes the strength, mystery, and unity of wolves, using detailed illustration techniques and modern digital tools to achieve high-quality results.

Technologies: Next.js, Typescript, MUI, React Hooks, Framer Motion

Responsibilities: Responsible for concept design, digital illustration, detailing, and final rendering of the artwork.

- **Lit Collective**

Description: A modern, responsive web application designed for a creative community to showcase and share their work. The platform highlights an elegant UI, smooth navigation, and dynamic sections for content presentation, providing a seamless user experience.

Technologies: React JS, MUI, Framer Motion, Tailwind CSS

Responsibilities: Responsible for front-end development, UI/UX design, and component integration.

- **Ethan Suero**

Description: A freelance digital design and Webflow portfolio website showcasing creative services, interactive layouts, and responsive design. The platform was built to highlight client projects, maintain brand identity, and deliver a smooth user experience across devices.

Technologies: React.js, MUI, Typescript

Responsibilities: Responsible for Web development, responsive design, and design-to-development implementation.
